

Seungyeon Kwag

B.S. Computer Science & Engineering · Seoul National University

tmddus0723@snu.ac.kr github.com/cloNoey instagram: clo_noey

RESEARCH INTERESTS

Large language models · Agent architectures · Multimodal perception · Long-term personalized memory

EDUCATION

Seoul National University
B.S. Computer Science & Engineering

2022 – present

PROJECTS

ODDC — One Day Dance Class
github.com/cloNoey/ODDC-cloNoey

Personal Project

Dance class discovery platform that structures unformatted Instagram data (images, text) into a searchable database — cutting the steps from class search to registration.

React · Vite · TypeScript · TailwindCSS · FastAPI · MySQL · n8n · Gemini AI

AllClear App
github.com/wafflestudio/allclear-app

Club Activity · Waffle Studio

Campus club discovery and review app built with Clean Architecture (Entity–Repository–UseCase–Presentation), featuring search, rankings, and a type-safe custom repository layer.

React Native · TypeScript · TanStack Query · Clean Architecture

SKILLS

Languages	Python · C++ · Java · HTML / CSS / JavaScript
Frameworks	React · FastAPI · Flutter · React Native
AI / ML	LLM APIs · Gemini · Prompt engineering · n8n automation

PLANNED COURSEWORK

CS Foundations · Operating Systems · Computer Networks · Database Systems · Algorithms & Data Structures · Computer Architecture	AI / Machine Learning · Machine Learning · Deep Learning · Natural Language Processing · Computer Vision · Reinforcement Learning
